Des effects and fits and he reduction, Continuer. Interrogation TO-Maths Conseil : y Retrovaille les sommes de lucmonn Exercise 1 1. Sn = 1 (cos ( $\pi$ ) + cos ( $\pi$ ) + ios ( $\pi$ ) Sn (F) = b-a & f (a+(b-a)) donc  $1 - \sum_{n=1}^{N} \cos\left(\frac{k\pi}{2n}\right)$  $\sin a = 0$ , b = 1 et  $f(a) = \cos(\frac{\pi}{2})$ pour 2 € [0:1] alors on a Sn = 15 f(\f)
On a bien f continue sur [0:1]. done Sn = 50 f(x) dx OR 1 f(n) dx = 10 (0 (17 x x)  $\left[\frac{2}{\pi}\sin\left(\frac{\pi}{2}n\right)\right] = \left[-\sin\left(\frac{\pi}{2}x_{2}\right)\right]$ donc Sn + X Sn = 5 K Sn = 1 5 K n = 1 5 K n k=1 k= + n Sn(f) = 0-a = f(a+b-a) $= \frac{1}{n} \sum_{k=1}^{\infty} \frac{\ell_k / n}{(n)^2 + 1}$ 

Exercice 2 5: Et arctan(t) VtopF = 1R eximities ou posons  $\left\{ \begin{array}{l} u(t) = \operatorname{arctan}(t) \\ v'(t) = 1 \end{array} \right.$ { u'(+) = 1 + t = Paa le
